BIOTEHNIŠKI CENTER NAKLO SREDNJA ŠOLA

During the mobility I learnt a lot about spending time in nature, preparing food outdoors, burning a fire and more. I have met many people and have learnt things I will be able to use later on in life.

Nejc Juntos

The mobility wasn't just about learning but also about meeting people and finding out about the differences between Nordic countries and the rest of Europe. Children are taught respect and trust from an early age. As a photographer I find Norwegian landscape downright amazing.

Nace Gosnik

Training in Norway was fantastic and just about the best experience I have ever had. My favourite part were outdoor activities such as hiking, exploring the landscape and more.

Bor Klančar

I loved the wonderful landscape with numerous waterfalls. I believe each of us developed some new insights and returned home with a new view of the world.

Tjaž Zorman

The exchange was a unique experience as I was able to visit a distant and different country as part of my school curriculum. I liked learning about Norwegian history, the architecture of towns and their unique food.

Timon Malnar

The training was a lot of fun and very useful, too. I will remember the trip forever, mostly the unspoilt nature, kind people and hanging out with the students.

PRACTICAL TRAINING 2019 NORWAY 2019

Between 20th October and 1st November 2019 six students and two teachers took part in a traineeship mobility at the Voss Jordbruksskule in Norway.

The students took part in a number of outdoor activities such as taking care of animals, preparing food outdoors, using navigation equipment and more. We learnt a great deal.

We loved the way of learning in Voss Jordbruksskule as the students spend a lot of time in nature, outside the school building. The most memorable part of our experience were long hikes that included hunting, campfires, preparing meals and playing various games.

The views were amazing. Perhaps most so on the field trip to the Hardangervidda Natursenter where we saw waterfalls and beautiful mountains sprinkled with herds of reindeer.

Norwegian education system is slightly different from ours. Emphasis is placed on outdoor activities such as hiking, mountain climbing, rafting, fishing, hunting, skiing and alike.

During their time at school the students take part in several camps and expeditions, which are organised by themselves and of course their teachers. Pre-school children in kindergartens are involved in a lot of outdoor activities as well, they are taught how to spend time outside and survive in nature from an early age.

We were thrilled about the programme of our mobility. We enjoyed meeting the students and staff at the Norwegian school but mostly their approach to teaching and learning.

Students:
Necj Junteš, Bor Klančar, Nace Gosnik, Tjaž Zorman, Tjaša Novak in Timon Malnar
Teachers:
Tadeja Polajnar, Rok Miščević
