

## NATIONAL PARK BERTCHESGADEN

### PROJECT POPREI – Erasmus+

In May 2022 Urška Kleč, Meta Vovk, Neža Čimžar and Mojca Logar visited national park Bertchesgaden in Germany. They prepared and showed us a special education program for young people. We took a look of a few workshops such as making a simple wooden products, a kitchen where they made butter, cheese, yogurth and a workshop with a special room for meteorological experiments. We spent two days with a guide from National park and we confronted with some problems in region. We arranged pasture which was damaged in windrolom. We cut down little spruces and larches and prepared pasture for bulding wooden fence. Next day we built special hotel. On another side of the park we made stone sculpture for the little rodents. We collected stones from fields and mixed them with roots. Hotel is located alongside the field. On the edge of the meadow they planted a lane of blossoming honey flowers for bees food. In German language the call that line of grass »Bienen Tankstelle«. We took a boat on the lake König See and visited a historial Bertchesgaden.
